

CALIFORNIA PROPOSITION 65 COMPLIANCE STATEMENT

Safe Drinking Water and Toxic Enforcement Act of 1986

Halsit Holdings, LLC dba Abbatron is committed to providing accurate regulatory information regarding the products we manufacture.

California Proposition 65 requires businesses to provide warnings when individuals may be exposed to chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm above established safe harbor levels.

The current list of Proposition 65 chemicals is maintained by the California Office of Environmental Health Hazard Assessment (OEHHA) and is available at:

<https://www.p65warnings.ca.gov>

Abbatron manufactures electronic components that may incorporate materials such as brass, steel, plated metals, plastics, elastomers, and other industrial materials obtained from qualified suppliers. Some of these materials may contain substances that appear on the California Proposition 65 list, including, but not limited to, lead contained in certain copper alloys and phthalates that may be present in certain plastic materials.

Products manufactured by Abbatron are industrial and electronic components intended for integration into larger assemblies and are **not intended for ingestion or prolonged direct consumer contact**. Whether a Proposition 65 warning is required depends on the specific application, manner of use, installation, maintenance, and potential exposure associated with the finished product.

Abbatron does not perform application-specific exposure assessments and does not determine whether a Proposition 65 warning is required for a customer's finished product. Customers are responsible for evaluating their specific application and determining whether warnings are required under California Proposition 65.

This statement is based upon information provided by our suppliers and our current understanding of applicable regulations. Abbatron will continue to monitor regulatory developments and update this statement as appropriate.

Document Revision Date: August 2026
