

**Compliance Statement for State of California Environmental
Protection Agency Office of Environmental Health Hazard Assessment
Safe Water Drinking and Toxic Enforcement Act of 1986**

California Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act of 1986, protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer. An exemption from the warning label requirement is provided by the Act when it can be demonstrated that product exposure is at or below "safe harbor levels", namely that the levels pose no significant risk of cancer or birth defects/reproductive toxicity.

The PROP 65 list of chemicals is available from the following website:

<http://www.oehha.ca.gov/proposition-65/proposition-65-list>

The products manufactured by Halsit Holdings, dba Abbatron, contain one or more of the listed chemicals in Proposition 65. These products may contain brass (lead content) and PVC (phthalates). Under normal conditions of use, Abbatron products pose no hazardous exposure to the user. Normal conditions of use are defined as the end use function the materials and design were intended for. Consequently, Abbatron is not required to label its products with a hazardous warning.
