

Certificate of Compliance PFAS of Concern

Per- and polyfluoroalkyl substances (PFAS) are a diverse group of human-made chemicals used in a wide range of consumer and industrial products. PFAS do not easily break down. Abbatron certifies that most parts supplied by us contain no PFAS, and reasonable steps have been taken to ensure that these parts furnished by Abbatron are not contaminated with PFAS compounds with exception to PTFE insulated terminals and pins. Below is a list of categories that may contain components with PFAS.

PTFE Insulated terminals & Terminals Part Number List (Contain PFAS):

- Anything with a suffix of "-10X", indicating color choice.
- Part numbers in the 4000 series of Nylon spacers and standoffs.

For the latest version of the PFAS Substance of Concern List, please refer to [CompTox Chemicals Dashboard](#)

Document Revision Date: May 15, 2025

Sincerely,

James A. Sitter
